

Order form Hydro 20-jet package system

How to complete this order form

Follow the instructions and comments found in the green panels. Once the form is completed, fill in the personal details and fax the form to (02) 9518 0216 or scan and email to sales@bathe.net.au

Important considerations

Pump installation

Pump will not fit completely under the rim of the bath. Pump is supplied detached and must be mounted below top jets and above suction intake to ensure pump primes when bath is filled and drains when bath emptied. It is recommended that the pump be located less than 2 metres from the bath. 10 amp supply required.

Pump dimensions

Length 410 mm x Height 245 mm x Width 150 mm

Control positions

These are determined by Bathe and will not be accepted if marked on this order form unless item 2 applies.

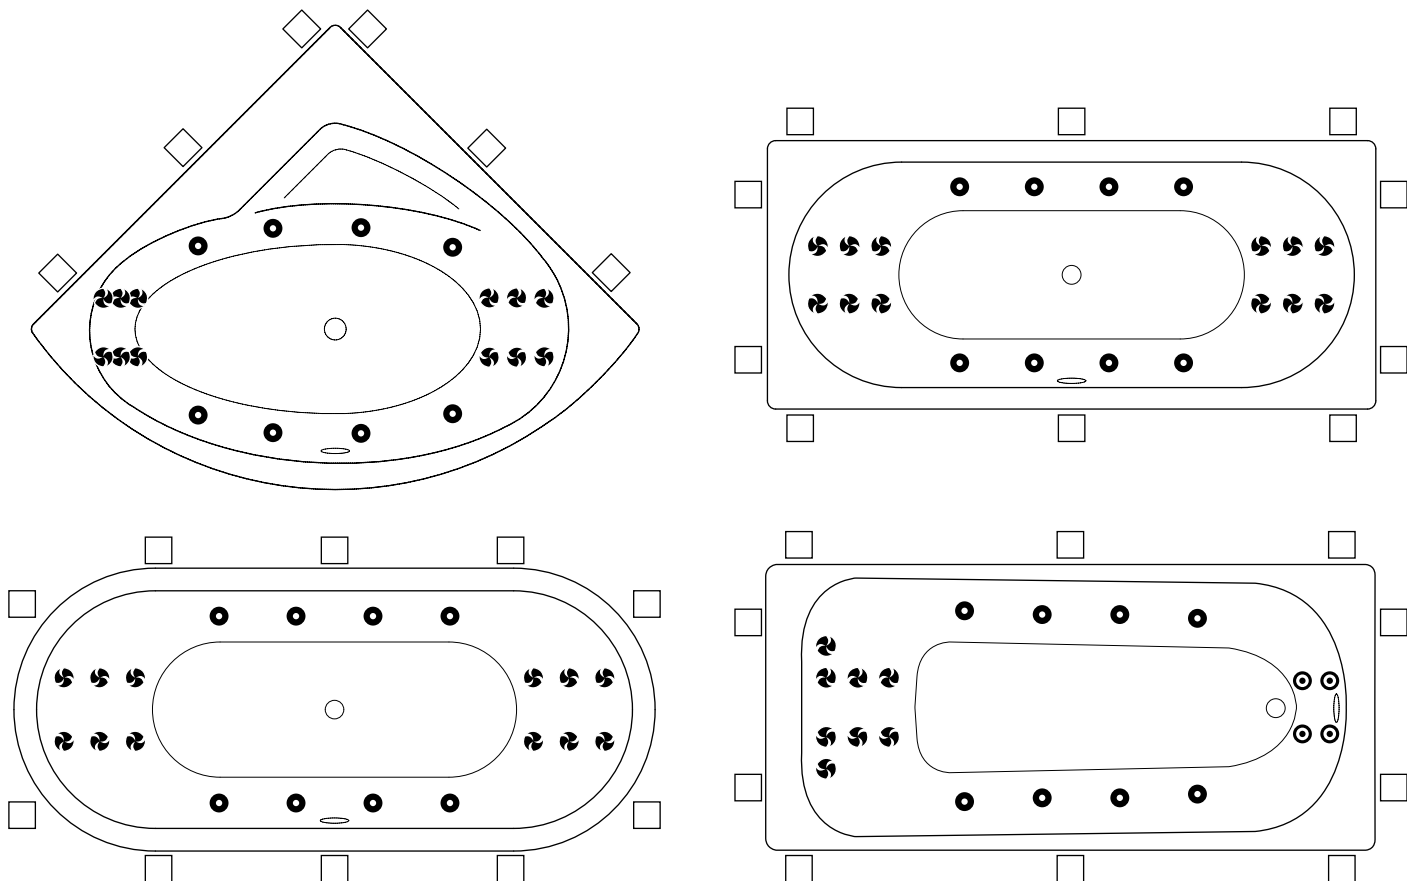

Select your upgrade options

1. Tick ONE box only, on your desired bath shape, to indicate the approximate pump position.
2. If bath is to be under-mounted or oval in shape, please mark approximate position of controls with a **C** for detached hob-mounting.
3. Tick boxes to choose your upgrade options (at right).

Note On/off controls are not able to be rim-mounted on Kaldewei Oval baths and will be supplied detached for remote hob-mounting. In this case the hob must not be more than 30 mm in thickness or should be rebated underneath.

- Bathelight
- Multifunctional cushions
- Multi Bath Filler
- Bathtub pillow
- Airspa
